PROFESSIONAL EXPERIENCE

Fashion Designer | UB Stitches | 2021 – 2026

- Managed customer consultations, requirements, measurements, fittings and order specifications, maintaining a strong focus on customer satisfaction.
- Worked within customer budgets by adjusting materials, designs and product specifications while maintaining quality standards.
- Evaluated customer preferences, order requirements and price sensitivity to inform product pricing and purchasing decisions.
- Reviewed pricing and customer feedback to identify opportunities to improve price positioning, attract new customers and increase revenue.
- Used customer feedback and preferences to refine product offerings, improve service delivery and encourage repeat business.
- Coordinated multiple custom orders, maintained customer records and managed daily operations while meeting quality standards and agreed deadlines.

PROFESSIONAL TRAINING

Data Analytics Training | AQskill | 2026

- Cleaned, transformed and validated datasets using Microsoft Excel and Power Query to improve data quality and reliability.
- Built interactive dashboards using Microsoft Excel and Tableau to monitor KPIs and communicate business insights.
- Analysed business data to identify trends, performance gaps and opportunities that support decision-making.
- Produced clear reports and visualizations that translate analytical findings into actionable business information.

PROJECTS

NaijaMart Sales Intelligence | Excel, MySQL & Power BI

- Conducted an end-to-end retail sales analysis using transactional data covering January to November 2024.
- Cleaned, prepared and analysed sales data using Microsoft Excel and MySQL.
- Designed an interactive Power BI dashboard to monitor revenue, product performance, category contribution and geographical sales distribution.

- Analysed monthly revenue trends, customer contributions and purchasing patterns.
- Presented actionable recommendations to support inventory planning, customer retention and business performance monitoring.

Excel Data Analytics Dashboard

- Built KPI dashboards using Pivot Tables, Pivot Charts, slicers and Power Query.
- Cleaned and transformed datasets to improve data accuracy and reporting quality.
- Applied VLOOKUP, XLOOKUP, IF statements and conditional formatting to analyse data.

Power BI & Tableau Visualization Project

- Designed interactive dashboards in Power BI and Tableau to communicate business performance and analytical findings.
- Used filters, calculated fields and dashboard actions to improve data exploration and visualization.
- Presented key trends and insights through clear, interactive visual reports.
